

SAP S/4HANA Transition with IBA Group

S/4HANA PRE-TRANSITION SERVICES

- Business Processes Insights
- Fit-Gap Analysis, Deficit Remediation
- ABAP Code Remediation
- Data Inconsistencies Remediation
- Data Archiving
- Unicode Conversion
- Dual Stack Split
- Upgrade to SAP ECC 6.0
- Customer / Vendor Integration (CVI)
- Transition to SAP Cloud Platform Integration Suite

S/4HANA TRANSITION AND CONVERSION SERVICES

- Error Mitigation & Data Validation
- Custom Code Conversion
- Transition Services by SAP Basis Experts
- Migration to Rise with SAP Cloud Environment

S/4HANA POST-TRANSITION SERVICES

- Adapting Database Extensions for S/4HANA
- Output Management
- Migration of the SAP Authorization Concept
- Redesign of the SAP Authorization Concept
- Enhanced Fiori UX And Authorization Configuration
- Expert Manual Data Migration
- Custom Code Adaptation
- Conversion of Employees to Business Partners

SAP S/4HANA TRANSITION SERVICES

Experience a seamless transition to SAP S/4HANA with our expert-led services designed to maximize your return on investment and propel your business into the digital age.

**DEAR FUTURE,
I'M READY...**

IBA GROUP: NAVIGATING YOUR SAP S/4HANA TRANSITION JOURNEY WITH EXPERTISE AND EXCELLENCE

- S/4HANA PRE-TRANSITION SERVICES

Migrating to SAP S/4HANA requires careful planning and preparation. Our Pre-Transition SAP S/4HANA Services are designed to prepare your business thoroughly for the transition to SAP S/4HANA. By addressing potential issues and meticulous planning, we ensure that your business operations continue smoothly during the transition and your team is ready to take full advantage of the capabilities of SAP S/4HANA from day one.

- S/4HANA CONVERSION SERVICES

Our proven S/4HANA Conversion Services offer a structured and efficient pathway for businesses looking to transition to SAP S/4HANA. With a dedicated team of experts, we provide end-to-end consulting and support throughout the conversion process, ensuring a smooth transition with minimal disruption to your operations.

- POST-TRANSITION S/4HANA SERVICES

The journey to S/4HANA doesn't end with the transition. In the subsequent phase, it's vital to tailor and adapt the new system to fit the specific needs of your business. Our Post-Transition SAP S/4HANA Adaptation Services are designed to ensure the seamless operation of your new S/4HANA system.

IBA Group leverages decades of technical proficiency and a proven track record in successful SAP implementations to deliver seamless and efficient SAP S/4HANA conversion experiences for businesses of all sizes.

A gravel road stretches into the distance under a clear blue sky. A large white arrow is painted on the road, pointing towards the horizon. Below the arrow, the word "START" is painted in large, white, stylized letters. The road is flanked by green and brown vegetation.

SAP S/4HANA PRE-TRANSITION SERVICES: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY

Pre-projects are a proactive measure that can make the difference between a rocky transition and a smooth one.

With IBA Group, you're not just choosing a service provider. You're choosing a partner committed to making your S/4HANA transition as efficient and beneficial as possible. We bring our vast experience, expert team, and proven success to the table, ensuring your pre-projects and transition journey are in capable hands

IBA GROUP: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY WITH PRE-TRANSITION SERVICES

BUSINESS PROCESSES INSIGHTS: NAVIGATE YOUR SAP S/4HANA TRANSITION

We deep-dive into your current processes, analyze performance and functionality, and empower strategic decisions for your transition to S/4HANA. Navigate your SAP journey with data-driven confidence.

What you will get: Operational Business Processes Analysis, Industry benchmarking, Process and Function Recommendations for your lines of business and end-to-end processes, and SAP S/4HANA Development Strategy.

FIT-GAP ANALYSIS: BRIDGING TODAY'S CAPABILITIES WITH TOMORROW'S GOALS

Our Service results in your roadmap from SAP ECC to S/4HANA. By thoroughly assessing your current setup, operations, and objectives, we tailor the optimal SAP S/4HANA configuration for your unique needs. We also check your system's technical readiness for a smooth transition.

What you will get: Business Impact Assessment, Simplification Item Report, As-Is and To-Be Analysis with Gap Identification, Analysis of Code Usage Report, ABAP Code Retirement Report, Fiori Apps Evaluation Report, Tailored Transition Plan, Compatibility Scope Analysis, Interface (API) Analysis, and High-Level Innovation Roadmap Report.

IBA GROUP: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY WITH PRE-TRANSITION SERVICES

DEFICIT REMEDIATION: ACCELERATE YOUR S/4HANA TRANSFORMATION

Our SAP S/4HANA Deficit Remediation Services offer comprehensive support to resolve transition challenges, optimizing your ERP system. Our experts focus on minimizing disruptions and enhancing S/4HANA utility.

Choose any of the activities needed for transition:

- Finance Pre-Conversion: General Ledger Migration, New Asset Accounting, Material Ledger, Credit Management, Cash and Liquidity Management
- Sales Pre-Conversion: Rebates Processing, Revenue Recognition
- Basic TM *... or request your own specific pre-project!*
- WMS/EWM

What you will get: Project Plan, Custom Solution Design, Implementation of Remedies, Outcome per requested activity, Testing, End User Training and Manuals, documents related to requested activities.

ABAP CODE REMEDIATION: REFINING CODE, ENSURING COMPATIBILITY

Our Service ensures your existing codebase is ready for S/4HANA. We analyze, update, and optimize your ABAP codes, identifying obsolete elements and rectifying syntax errors to ensure seamless compatibility with the S/4HANA environment. By remediating any code that could affect S/4HANA functionalities, we reduce the risk of operational issues in post-migration.

What you will get: Custom Code Analysis Report, Corrected ABAP Code, Compliance Report, Test Results Documents, Validation Report, and technical documentation.

IBA GROUP: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY WITH PRE-TRANSITION SERVICES

DATA INCONSISTENCIES REMEDIATION: PERFECTING YOUR DATA

Our Data Inconsistencies Remediation Service is your safety net against critical errors in your system and user data. We meticulously review and resolve the issues identified during the Technical Readiness Assessment, ensuring data integrity and smooth operation.

What you will get: Data Errors Remediation Concept and Recommendations Reports.

DATA ARCHIVING: SECURING YOUR LEGACY, STREAMLINING YOUR TRANSITION

We meticulously remove business-complete application data and master data from the database, ensuring a consistent, secure, and comprehensive process. This data is stored for future accessibility, helping to minimize downtime, save server resources, and streamline your conversion project. With us, you safeguard your legacy while simplifying your transition.

What you will get: Data Archiving Strategy, Archived Data, Data Compression, Regulatory Compliance, Performance Improvement, Transparent Data Retrieval, and Archiving Documentation.

IBA GROUP: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY WITH PRE-TRANSITION SERVICES

UNICODE CONVERSION: UNIFYING LANGUAGES

As S/4HANA supports only Unicode systems, this conversion is a mandatory prerequisite. Through our service, you'll seamlessly upgrade to a computing standard that enables your system to handle text data from diverse languages.

What you will get: Unicode Conversion Plan, Converted System, System Validation Report, and Technical Documentation.

DUAL STACK SPLIT: PAVING YOUR SINGLE- STACK PATHWAY TO S/4HANA

If your system is a dual-stack, where ABAP and Java applications coexist, you can choose an essential split service which is a mandatory prerequisite for S/4HANA transition, as it supports only single-stack (ABAP) systems.

What you will get: Dual Stack Split Plan, Separated ABAP and Java Systems, System Validation Report, and Technical Documentation.

UPGRADE TO SAP ECC 6.0: BRING THE SYSTEM TO AN INITIAL STATE REQUIRED FOR S/4HANA TRANSITION

For a successful one-jump to S/4HANA, your source system needs to be at least on ECC 6.0. Our service ensures this, irrespective of your current Enhancement Package version. Prepare for the future of SAP with our ECC 6.0 Upgrade Service, creating an optimal starting point for your S/4HANA journey.

What you will get: Technical Upgrade Plan, detailed report on your current technical system, Technical Upgrade Execution, Upgrade Roadmap, Upgrade Manuals, Upgrade Script, System Errors Report and elimination of errors, and Recommendations for further system maintenance.

IBA GROUP: LAYING THE GROUNDWORK FOR YOUR SMOOTH S/4HANA JOURNEY WITH PRE-TRANSITION SERVICES

CUSTOMER / VENDOR INTEGRATION (CVI): UNIFYING YOUR DATA

Our Customer/Vendor Integration (CVI) Service facilitates a seamless transition from individual customer and vendor master data to the integrated Business Partner (BP) model in SAP S/4HANA. This includes conversion of your current data and synchronization with the BP model, ensuring smooth transition during your migration to S/4HANA.

What you will get: Converted Master Data, Conversion Documents: Data Mapping Document, Data Conversion Report, Data Validation and Quality Report, and Post-Conversion Recommendations.

TRANSITION TO SAP CLOUD PLATFORM INTEGRATION SUITE

The service entails a comprehensive transition of your organization's integration processes from SAP Process Orchestration (PO) to SAP Cloud Platform Integration Suite. Choosing our service, your organization gains access to a team of seasoned SAP experts who bring deep knowledge of both SAP PO and SAP Cloud Platform Integration Suite. We follow proven methodologies and leverage industry best practices to ensure a smooth and successful transition. With our service, you don't just upgrade your technology. You upgrade your business processes and create a foundation for the future.

What you will get: Assessment and documentation on the Current Landscape, Transition Strategy and Plan, Integration Flows Migration, Testing and Validation, End User Training and User Manuals, Cutover and Go-Live Support, Post-Transition Support, and Transition Documentation.

DRIVING DIGITAL TRANSFORMATION: YOUR SAP S/4HANA CONVERSION COMPANION

The conversion process can be complex, requiring detailed planning, technical expertise, and a careful execution strategy to avoid business disruption and ensure a successful transition.

That's where our SAP S/4HANA Conversion Service comes in, ensuring a smooth and seamless conversion experience. IBA Group brings a wealth of experience in SAP conversions, having guided numerous clients through successful transitions to SAP S/4HANA.

CREATING A CLEAR PATH: ERROR MITIGATION & DATA VALIDATION

This offering focuses on detecting and resolving critical errors identified during the Technical Readiness Assessment and ensuring data integrity. The result is not just a successful transition, but also the foundation for robust S/4HANA operation, backed by accurate, validated data.

What you will get: Error Analysis Report, Resolved System, Validation Report, and Technical Documentation.

CUSTOM CODE CONVERSION: ADAPTING YOUR CODE FOR S/4HANA

Our Custom Code Conversion service forms the backbone of a flawless transition from ECC to S/4HANA. Recognizing the vital role of custom code in your business operations, we conduct a detailed analysis and modify your code for S/4HANA compatibility.

What you will get: Custom Code Analysis Report, Converted Custom Code, Test Reports, Compliance Documentation (a comprehensive document confirming that all converted custom code complies with S/4HANA standards and guidelines), and Conversion Documentation.

SAP S/4HANA TRANSITION SERVICES BY EXPERT BASIS SPECIALISTS

Our team of certified SAP Basis specialists offers a comprehensive suite of services for your organization's migration to SAP S/4HANA.

What you will get: Technical Converted System and System Landscape documents.

TRANSITION TO RISE WITH SAP CLOUD ENVIRONMENT

RISE with SAP is a comprehensive offering that aims to facilitate transition of organizations to a cloud-centric intelligent enterprise. It is centered around SAP S/4HANA and provides a single SAP contract that covers all components, with additional contracts with partners for services or add-on packages, as needed.

For clients looking to move their existing S/4HANA system into the RISE with SAP environment, IBA Group offers a five-step Brownfield approach using the System Copy – Backup/Restore method via a migration server.

What you will get: Transition Project Plan, Upgrade Report, System Backup, Backup Log, Restoration Report, Consulting Report including recommendations, strategic insights, and action plans for further maintenance, Migration Summary, and System hosted in cloud under the Rise with SAP offer.

CONTINUED SUCCESS WITH SAP S/4HANA: POST-TRANSITION SERVICES

After transitioning to S/4HANA, your organization will be adjusting to new processes and functionalities. During this period, you may encounter unexpected challenges or require further optimization to fully harness the power of SAP S/4HANA.

We have a deep understanding of how to adapt to a new ERP system and therefore created Post-S/4HANA Transition Services designed to address adaptation challenges, providing the expertise and support you need to maximize the return on your S/4HANA investment.

ADAPTING DATABASE EXTENSIONS FOR S/4HANA

When you convert your system from SAP Suite on HANA to SAP S/4HANA, modifications to the SAP HANA database remain unchanged. However, to make your modifications visible on the UI, manual steps may be required in different content layers.

What you will get: CDS View Adaptation: Extension of Core Data Service (CDS) views.

OData Service Adaptation: Handling of automatic artifact generation and redefinition of OData services, and UI Adaptation.

OUTPUT MANAGEMENT

Our Output Management Service ensures seamless communication between your SAP S/4HANA system and your output devices, creating a productive, efficient workflow. We offer end-to-end services, including the setup of the new output management framework in S/4HANA.

What you will get: Prerequisites Configuration, bgRFC Setup, Storage System and Category Setup, BRFplus Configuration, ADS Implementation, Printer Setup, End User Training, and User Manuals.

SECURING ACCESS: STREAMLINED AUTHORIZATION CONVERSION FOR S/4HANA

MIGRATION OF THE SAP AUTHORIZATION CONCEPT

Technical conversion is a compromise solution for companies that do not have a standard-compliant role concept and cannot carry out a holistic redesign of the authorization roles due to time constraints and possible downtime. However, a redesign of your entire authorization concept must be considered in order to guarantee the maintainability and security of the roles in the future.

What you will get: Audit Report of an Existing Authorization Concept, Role Migration Report, Test Simulation Report, Active Roles in The New System, and Recommendations for Further Role Maintenance.

REDESIGN OF THE SAP AUTHORIZATION CONCEPT

The option is applicable, if your SAP ECC authorization concept does not meet security-related requirements or is difficult to maintain, or processes must be fully optimized. It is ideal for companies that have seen substantial growth through acquisitions, resulting in repeated authorization complexity and those that want to adopt SAP standards for S/4HANA conversion. If this is not the case, the authorization concept is of good quality, and the processes are stable, the doors are wide open for a standard-compliant migration of your SAP authorization concept.

What you will get: Audit Report of an Existing Authorization Concept, Authorization (Security) Concept, Role Design, Templates Roles for Job Functions, Test Simulation Report, Active Roles in The New System, and Recommendations for Further Role Maintenance.

INTUITIVE INTERACTION: ENHANCED FIORI UX AND AUTHORIZATION CONFIGURATION

PERSONALIZED FIORI APPLICATIONS AND CONFIGURATIONS

Plan to enable SAP Fiori UX with our specialized service, ensuring a user-centered transition to S/4HANA. We can create a secure user-friendly environment that helps your team fully leverage the power of S/4HANA.

What you will get: Recommended list of Fiori applications, Front-End Catalog Definition, Front-End Business Role Definition, SAP Fiori Catalogs and PFCG Roles Integration, Detailed Integration Report, and Configuration of SAP Fiori Launchpad.

CUSTOMIZED UI ADAPTATION FOR S/4HANA

Our Adapting the User Interface (UI) service is dedicated to personalizing your SAP S/4HANA system to meet your unique business requirements. We tailor the UI to provide an intuitive and seamless experience that aligns with your company's workflows, roles, and preferences.

What you will get: UI Assessment Report, Customized UI Design, UI Prototypes, End User Trainings and Training Materials, and Post-Implementation Support Plan.

ADAPTING TO CHANGE: TAILORING YOUR CUSTOM CODE FOR S/4HANA

After SAP S/4HANA system conversion – during the realization phase – you need to adapt your custom ABAP code to the new SAP S/4HANA software (functional adaptation) and optimize performance for the SAP HANA database (performance tuning). Our service aims to assist you in the process of adapting your custom code. This process is crucial to ensure the smooth operation of your custom code in the new system environment.

What you will get: Custom Code Analysis Report, SAP HANA and SAP S/4HANA Checks Report, Functional Adaptation Summary, Modification and Enhancement Adjustment Report, Fixing SAP HANA and SAP S/4HANA Findings Report, Performance Tuning Report, and Testing Report.

EXPERT MANUAL DATA MIGRATION

Our manual data migration service from SAP ECC to S/4HANA is a thorough, end-to-end solution for businesses needing to transfer their existing data assets to the new SAP platform. This service entails a series of stages, including initial analysis, data extraction, data cleansing, transformation, validation, loading, and post-migration support.

What you will get: Initial Data Assessment and Mapping Documents, Data Migration Plan, Data Extraction and Cleansing, Data Transformation and Enrichment, Data Validation and Loading, project documents (Data Cleansing Report, Data Validation Report, Data Reconciliation Report, Data Migration Closure Report, and User Training Manuals).

HUMAN RESOURCES - CONVERSION OF EMPLOYEES TO BUSINESS PARTNERS

In your journey to convert your system to SAP S/4HANA, the implementation of the Employee Business Partner is a mandatory step, if HR data based on HR infotype and PERNR data model is needed. This applies regardless of whether the HR data is locally maintained or integrated via SAP HCM, SAP SuccessFactors Employee Central, or a third party HCM system.

What you will get: HR Data Integration Strategy, HCM Integration Activation, Use of New or Legacy Employee Business Partner Model, Data Model Transition, Migration Report Execution, and System Synchronization.
